ASSETWIN VERSION 6.5 RELEASED

NAPERVILLE, ILLINOIS, (December 1, 2005) – Asset Systems has announced the release of AssetWIN version 6.5, effective December 1, 2005. This new release features improvements to the user interface, expanded standard reports and expanded export capabilities. Since the introduction of AssetWIN in 1996, the company has released 11 versions of the product which supports Microsoft Access®, SQL Server® and Oracle® databases.

Version 6.5 introduces an intuitive command pane allowing simple access to various system functions. Reports have been expanded to provide standard report sets for transaction history and auditing. Export improvements include enhancements to XML exports and preformatted transaction sets for BNA Fixed Assets. BNA is the company's partner for fixed asset accounting applications.

“All too often, we found our customers reinventing reports for transaction tracking and auditing using our report writer,” observed Alden Snyder, President of Asset Systems. “To help, we created report sets in the standard product to achieve the same ends.” Virtually all of the improvements in Version 6.5 are the result of client suggestions.

Asset Systems, Inc., based in Naperville, IL, was formed in October, 1987. Its flagship product, AssetWIN, provides bar code based asset management solutions for clients throughout North America. For more information call (877) 955-4321 or log on to www.assetsystems.com.
