### **ASSET SYSTEMS, INC. OFFERS SARBANES-OXLEY FIXED ASSET SOLUTIONS**

NAPERVILLE, ILLINOIS, December 1, 2004 – Asset Systems, Inc., has announced expanded product and service offerings to support the 2002 Sarbanes-Oxley compliance laws.

Since the passage of Sarbanes-Oxley in 2002, publicly held companies have faced increased requirements for more accurate audit standards and internal controls on the companies fixed assets and their values. Though traditional approaches did not assign high priority to maintaining detailed, auditable records on fixed assets, this new legislation changed the rules. Now there is no choice.

But, now there is a solution. In an effort to better serve the demand for large-scale, complex fixed asset control requirements, Asset Systems has bundled software based asset ledger verification and reconciliation service with highly scalable asset management software. The end result addresses both near term compliance requirements and permanent improvements in asset controls.

Several elements proved crucial in developing this new solution. First, Asset Systems for the past 17 years has provided highly trained and experienced professionals to perform the field inventories directly for companies. This professional service foundation is coupled with an array of Asset System's state-of-the-art products and technology to automate the entire process. This results in quick and accurate data recording and analysis. The final component is a host of reporting tools to reconcile field result to historic records on demand. The ultimate result is an accurate and timely asset assessment to keep a corporation meeting all of the demands of the new compliance rules.

"We continually upgrade our software and platforms to ensure that we are state-of-the-art and meeting all of our customers needs in this ever-growing demand for accurate and accountable asset management," said Alden Snyder, president and founder of Asset Systems, Inc. "Sarbanes-Oxley represents a huge paradigm shift in how public companies account, manage and track their assets. Our view is that only an automated, highly adaptable program will yield a permanent solution."

Asset Systems, Inc., based in Naperville, IL, was formed in October, 1987. Its flagship product, AssetWIN, provides bar code based asset management solutions for clients throughout North America. AssetWIN version 5.0 was released in early 2004. Version 6.0 is expected to be released in the first quarter of 2005.
